

A photograph of a traditional Japanese garden. In the center, a red wooden arched bridge spans a small pond. The bridge has a curved railing and is surrounded by lush green plants and rocks. The water in the pond reflects the bridge and the surrounding foliage. In the foreground, there are large, dark, textured rocks. The background is filled with dense green trees and shrubs. The overall scene is peaceful and scenic.

2016 STORMWATER CALENDAR

Moon Bridge, Japanese Gardens at Birmingham Botanical Gardens
Photo Credit: Charles Clecker

JANUARY

Anything left on the ground and exposed to rain can cause water pollution. Storm drains carry untreated rainwater from paved areas directly to local creeks and streams.

You may be surprised at how much your car care habits affect water quality. Fortunately, there are many things such as fixing and repairing leaks that you can do to prevent your automobile from being a source of water pollution.

1 DROP MATTERS!

Jerico W. - Age 13

REPAIR LEAKS, CLEAN UP SPILLS

BY PROPERLY MAINTAINING YOUR VEHICLES,
YOU CAN PREVENT WATER POLLUTION.

ONE DROP OF OIL LEAKED FROM EACH VEHICLE IN
JEFFERSON COUNTY POLLUTES 16 MILLION GALLONS OF
WATER PER DAY. PROMPTLY FIX AND REPAIR LEAKS.

You can clean up any spilled oil or vehicle fluids by sprinkling some absorbent material like cat litter on the area, let it soak up the drips, sweep it up, and dispose of it in the trash. Never use water to wash off paved surfaces.

Routinely monitor for leaks. Follow recommended maintenance. Carefully fuel to avoid drips or spills. Recycle used motor oil at an oil change or retail facility that accepts these materials.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

Many household products contain chemicals that should not be spilled or discarded where they could be washed into a storm drain. Only purchase what you need for the job and properly dispose of any leftovers. Visit RecycleAL.com to learn more.

Common pantry items like baking soda and vinegar easily can be used to make safe, inexpensive household cleaners. They are better for your health and the environment, help reduce the purchase of more toxic products, and cost less! There are many tips and recipes available online for making your own cleaning products.

MARCH

If your garden isn't coming up as beautifully as your neighbor's, it may not be a green thumb that you're missing. The quality of the soil is a major factor in how lush and green your garden grows.

You can purchase a soil test kit from your local lawn and garden store, or pick up a free kit from an Alabama Cooperative Extension System (ACES) office and have your soil sample analyzed by Auburn University for \$7. Visit aces.edu for more information.

"SPREAD" THE WORD!

Kimora K. - Age 12

TEST YOUR SOIL BEFORE YOU BUY

BY APPLYING THE CORRECT PRODUCT IN APPROPRIATE AMOUNTS, YOU CAN PREVENT WATER POLLUTION.

IT IS EASY TO APPLY TOO MUCH FERTILIZER WHEN YOU DO NOT KNOW WHAT YOU REALLY NEED. ANY EXCESS JUST GETS WASHED OFF BY RAINFALL OR IRRIGATION AND POLLUTES OUR WATERWAYS.

Help for your home gardening challenges is just a phone call away. For any of your gardening inquiries, call a Master Gardener Volunteer at 1-877-252-GROW and select option 3 for the Birmingham area.

If your soil test report recommends adding lime or fertilizer to your soil, it will specify the amounts to use. Look for 3 numbers for nitrogen, phosphorous, and/or potassium displayed on the fertilizer package to make sure you are purchasing the right product for your soil.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

MARCH 2016

27 <i>Easter</i>	28	29	30	31		

APRIL

You can set your spreader to the recommended application rate by adjusting its dial to the number specified in the package directions.

Using more fertilizer than recommended or using the wrong type will not help your lawn or garden to grow. Test your soil and read package directions to be sure.

When calculating the square footage of the area you plan to fertilize, don't forget to subtract the size of paved areas from the total.

"SPREAD" THE WORD!

FERTILIZE CORRECTLY

BY KEEPING FERTILIZER OFF OF PAVED AREAS,
YOU CAN PREVENT WATER POLLUTION.

ANY EXCESS JUST GETS WASHED OFF BY RAINFALL
OR IRRIGATION AND POLLUTES OUR WATERWAYS.
ALWAYS FOLLOW LABEL DIRECTIONS.

Never apply fertilizer right before or during a rain because it will be washed into the storm drainage system and carried to the nearest stream or creek.

Buy just enough product for the job so that you won't have to properly store any leftovers.

Finish the job by sweeping up any fertilizer that lands on paved areas!

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

MAY

IN A PERFECT WORLD!

Most wild animals do not live in close proximity to one another. That is why there is nothing natural about 150,000 domesticated dogs concentrated in an area the size of Jefferson County.

An average sized dog produces about 1/2 pound of waste per day. If you combine all of our dogs' waste, that's about 38 tons per day!

The average pile of dog waste contains 2.5 billion fecal coliform bacteria, viruses, and parasites. These pathogens can live in both soil and water, and people and pets are at risk of illness if they are exposed to them.

IT'S YOUR "DOODY"

BY PICKING UP AND PROPERLY DISPOSING OF PET WASTE, YOU CAN PREVENT WATER POLLUTION.

PET WASTE CONTAINS HARMFUL BACTERIA WHICH IS WASHED BY RAINFALL AND IRRIGATION. PET WASTE POLLUTES OUR WATERWAYS.

Pets don't pick up after themselves. So until that happens, it's YOUR 'doody':

- 1- Pick it up.
- 2 - Bag it.
- 3 - Trash it.

Dog waste does NOT fertilize the grass. If not picked up and properly discarded it can wind up in local creeks and streams when rain washes it from the ground.

Some common plants and yard chemicals are toxic for dogs. Visit aces.edu to learn how to care for your yard while keeping your pet safe.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

JUNE

Got bugs? Call the Plant Diagnostic Lab in Birmingham at 205-879-6964 ext. 19 to help you identify the insect problems and diseases that are plaguing your lawn or garden.

Some bugs are beneficial to humans because they eat harmful bugs and assist in helping keep plants healthy. Some even perform vital functions for our food crops.

Integrated pest management (IPM) strategies are simple. Identify the pest before reacting. Start with non-chemical tactics. If pesticides are needed, use the least toxic products first.

“BEE” RESPONSIBLE!

PESTICIDES DON'T PICK & CHOOSE

INSECTICIDES KILL ALL INSECTS, EVEN THE ONES YOU DID NOT INTEND TO HARM, SUCH AS OUR FOOD POLLINATORS.

CONSIDER ALTERNATIVES TO PESTICIDES. CHOOSE THE LEAST TOXIC PRODUCTS FIRST. APPLY PRODUCTS ONLY IN THE LATE EVENINGS WHEN POLLINATORS ARE NOT ACTIVE.

Butterflies and other pollinators are dying because they are the unintended casualties of broad spectrum pesticide application. Spot treat affected plants and avoid over spray.

If bees completely disappear, more than 1/3 of the world's crops would disappear. There also would be much less feed for raising livestock.

You can do your part by using pesticides only when necessary, and spraying early in the morning or late in the evening when pollinators are not out looking for food. Consider planting bee friendly plants in your yard. Visit www.aces.edu/urban/TreesforBees to learn more!

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

JULY

Stormwater picks up pollution as it comes in contact with the ground, paved areas, and other surfaces, and carries these untreated substances into the storm drain system. Stormwater that carries pollution is called polluted runoff.

Reduce runoff by aerating your lawn and amending your soil to enhance its water retention.

Water early in the morning or late in the evening to reduce evaporation and maximize watering efficiency.

REDUCE RUNOFF!

WATER THE LAWN, NOT THE STREET

BY KEEPING WATER FROM LEAVING YOUR PROPERTY, YOU CAN PREVENT WATER RUNOFF AND WATER POLLUTION.

RUNOFF CARRIES LAWN PRODUCTS AND LOOSE SOIL TO OUR WATERWAYS CAUSING POLLUTION. DIRECT SPRINKLERS AND DOWNSPOUTS ONTO LAWNS, NOT DRIVEWAYS & SIDEWALKS.

Look for ways to reduce the amount of water your yard needs. Choosing native plants which are drought and pest resistant is a good start. Visit aces.edu for more information.

Add or reapply mulch to garden beds to retain moisture and reduce the frequency of watering.

Look for ways to keep rainwater on your property by using features in your landscape to slow it down, spread it out, and allow it to soak in.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

SEPTEMBER

Instead of piling your leaves or grass clippings on the curb, start looking at them as a resource instead of a nuisance by using them as mulch or in a compost pile.

You can reduce the amount of garbage your household generates by adding kitchen scraps such as vegetable and fruit peels, coffee grounds, and egg shells to your compost pile. Never add grease, animal waste, or other animal products to the pile.

IT'S "MULCH" BETTER!

Kaden M. - Age 12

FLOOD

IT AFFECTS YOU!
LEAVES IN ROADWAYS
OR ROADSIDE DITCHES
BLOCK RAIN FROM
ENTERING STORM DRAINS
CAUSING FLOODING.

FOOD

SAVE MONEY!
MULCHED LEAVES WILL
DECOMPOSE SUPPLYING
PLANTS WITH A NATURAL,
SLOW RELEASE FORM OF
FREE FOOD.

ONE LETTER CHANGES EVERYTHING. KEEP LEAVES OUT OF
ROADWAYS, ROADSIDE DITCHES, AND STORM DRAINS.

Mulch enriches soil by supplying micronutrients, stabilizing soil temperature, retaining moisture, and reducing weed growth.

Compost is ready to use when it no longer resembles what it originally was, and looks and smells like rich crumbly soil. Compost improves the quality and texture of soil, adds nutrients and helps retain moisture.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

OCTOBER

Running a lawnmower without the bag attached over the leaves in your yard will chop them into bits and drop the bits back onto your lawn. These bits will decompose on your lawn and provide **FREE** slow release fertilizer.

Bagging leaves for trash pickup is just throwing away a valuable resource. Use your leaves and yard waste to start a compost pile at home.

IT'S "MULCH" BETTER!

LEAF MULCH MAKES FREE FOOD

BY RELYING ON NATURE TO FEED AND PROTECT YOUR LAWN AND GARDEN BEDS, YOU CAN PREVENT WATER POLLUTION.

FALLEN LEAVES CONTAIN NUTRIENTS THAT PROVIDE FREE PLANT FOOD. MULCH SMOTHERS WEEDS, HELPS SOILS RETAIN MOISTURE, AND REDUCES SOIL EROSION.

Got too many leaves for your lawn mower to handle? Use your fallen leaves as mulch for your garden beds as a **FREE** way to reduce weeds and retain moisture around plants.

Now is the best time to plant trees, shrubs, and other additions to your landscape! Also, don't forget to winterize your plants by reapplying mulch to your garden and flowerbeds.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

DECEMBER

Think twice before pouring used cooking oil and grease outside to dispose of it or to control weeds. This practice attracts unwanted 'visitors' to your home . . . and they might even bring their friends!

Instead of dooming your old electronics and holiday decorations to the landfill, why not recycle them? Visit www.recycleAL.com to find facilities that will accept these and other holiday items.

UMMM BACON!

YOU CREATED THE GUEST LIST

BY PROPERLY DISPOSING OF YOUR USED COOKING OIL AND GREASE, YOU CAN PREVENT WATER POLLUTION.

COOKING OIL & GREASE POURED ONTO THE GROUND INVITES UNWANTED GUESTS TO YOUR HOME & POLLUTES OUR LOCAL WATERWAYS. RECYCLE USED COOKING OIL FOR FREE.

Rats, raccoons, opossums and other vermin will feed on any type of grease, oil, or other food waste that you place uncovered outside your home. These animals can carry disease and create a health risk for humans.

Keep creepy critters away from your home by recycling used cooking oil and grease at one of Jefferson County's 19 collection centers. It's easy, convenient and FREE! Visit jeffcoes.org to find a location near you.

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

DECEMBER 2016

TIPS FOR GREEN HOLIDAYS

Free the Tree!

Recycle or repurpose your Christmas tree. Visit www.recycleAL.com for recycling information and ideas.

Recycle Paper

Try wrapping your presents in brown or recycled paper.

Turn off the Lights

Christmas tree lights left on for 10 hours a day over the 12 days of Christmas produce enough CO₂ to inflate 12 balloons.

Defrost your freezer before the Holidays

It will work more efficiently and create more space to store leftover food, so that it doesn't go to waste.

NOTES

City of Birmingham and Jefferson County Stormwater Management Programs would like to thank all the partners who contributed to the 2016 Stormwater Calendar. We would like to send special thanks to the Fresh Air Family. They donated the Gross-out Camp Scholarships to the artwork winners.

This year's calendar would not have been possible without the Friends of Birmingham Botanical Gardens (FOBBG) and The Birmingham Cultural Alliance Partnership (BCAP) partnering with our Stormwater Management Programs. The partnership with these two organizations has allowed us to educate Birmingham City Students in organized enrichment activities, including a poster competition. Students learned the importance of being positive environmental stewards at school and in their communities through presentations and projects centered on stormwater management and the theme "Only Rain Down the Drain!"

To report environmental issues within the City of Birmingham, call 311.

To report a sanitary sewer overflow, please call 205-942-0681.

To report suspected water pollution within unincorporated Jefferson County, call 205-325-5792.

BIRMINGHAM FORWARD

— MAYOR WILLIAM A. BELL, SR. —
