9. LICENSES. Before commencing any of the Services, Firm, at its expense, will secure and maintain in full force and effect throughout the term of this Agreement all licenses, permits or other governmental authorizations needed to complete its work, including without limitation, a business license issued by the City.

10. OWNERSHIP OF INFORMATION; CONFIDENTIALITY. Scope of Services

Project Information

The OnePratt project will consist in the construction of an 8-acre open space and community building(s). The project includes a large elevated terrace, a look-out tower, an amphitheater, playground, community building, central lawn, and an outdoor reading area. The site is bordered to the north by Lafayette Street, to the south by Hibernian Street, to east by Lacey Rd and to the west by Dugan Avenue. The existing Prattville Library is located at the southwest corner of the site. Construction will likely consist of light wood or steel framing for the look-out tower, the amphitheater and the community building (Hibernian Gateway).

Scope of Services

The purpose of the surface exploration will be to determine general subsurface conditions of the subject property and to gather data on which to base a geotechnical evaluation with respect to the proposed construction. Firm's scope of services will include a subsurface exploration consisting of eleven (11) soil test borings at the locations shown on the attached proposed boring location plan. All borings will be advanced to a depth of 10 feet below the existing surface, with the exception of the boring located at the observation tower, which will be advanced to a depth of 25 feet, or auger refusal. Rock coring beyond the auger refusal depths is not included in the scope of services.

Laboratory analysis will include:

- Twenty-four (24) Natural Moisture Content Tests
- Four (4) Atterberg Limits Tests
- Four (4) #200 Wash Tests

The results of the work will be documented in a written report that will address the following items:

- Site geology and potential impact on the site development.
- Summary of existing surface conditions.
- A description of the subsurface and groundwater conditions encountered at the soil test boring locations. Long-term water level monitoring is not included in this proposal.
- Presentation of laboratory test results.
- Site preparation considerations, including materials types to be expected at the site and treatment of unsuitable soils, if encountered.
- Compaction requirements and recommended criteria to establish suitable material for structural backfill.
- Recommendations for pavement sections, based on assumed traffic conditions.
- Recommendations to be used for foundation design, including appropriate foundation types, bearing pressures, and depths.
- Recommendations for below-grade walls, including earth pressure coefficients.

Budget

The cost of services will be based on the amount of work necessary to evaluate the geotechnical conditions for preliminary planning and design purposes. Based on the scope of work described in this proposal, the total budget is \$6,200.00. The breakdown of the costs is as follows:

Subsurface Exploration	\$2,900.00
Laboratory Testing	\$370.00
Laboratory Testing Contingency for Unusual Soil Conditions	\$600.00
Geotechnical Evaluation and Report Preparation	\$1,330.00
Consultation and Planning Meetings (if required, 8 hours at \$125/hr.)	\$1,000.00
Contingency	\$1,600.00
Total:	\$6,200.00

If conditions are encountered that require additional subsurface exploration or analysis, Firm will discuss a modified work scope with the City.

Site Access/Utilities

The subject site appears to be covered in grass and weeds, based on available Google Earth Images. Firm does not anticipate that clearing or access preparation will be required to access the proposed boring locations. No re-grading or re-vegetation of the site following the completion of the field exploration is included in the scope of work. The borings will be backfilled with auger cuttings upon completion of drilling.

Firm will contact the Alabama One-Call Center to locate underground utilities at the site. Firm requests the current owner provide us with any available information regarding underground utilities. Building & Earth will not be held liable for damage to unmarked utility lines or lines marked erroneously by others.

Authorization

Firm is authorized to proceed upon receiving written Notice to Proceed by the City. Changes to the work scope by virtue of design changes or unusual subsurface conditions should be authorized in writing.

Firm anticipates that the field exploration could be started within five (5) business days after receiving written authorization to proceed. The written geotechnical report will be available within ten (10) business days following the field exploration. Firm will discuss the site conditions with the City during the course of the work and can provide preliminary recommendations as the work proceeds. Weather may extend the time required for the field exploration (and overall schedule) if rainy days occur prior to or after commencement of the exploration.
