Please be aware that the area around mature trees (left in place) and infiltration-based green infrastructure practices (GIPs), such as bioretention, urban bioretention, infiltration trench, dry WQ swale, downspout disconnection, and reforestation, must be protected at all times during construction to avoid soil compaction and damage to trees and vegetation. Install and maintain protective fencing around these areas. Fencing should bound the drip line of trees and exterior boundary of GIP footprints plus 5 feet (at least).

As well, the construction of GIPs must be done carefully to avoid soil compaction and discharges of sediment and construction related waste to GIPs during their installation. Avoid moving heavy equipment and vehicles through the GIP footprint and do not use GIP areas as sediment basins, storage areas, roadways, and waste areas.

Will mature trees be left in place during construction? Yes No

Will infiltration-based green infrastructure practices be installed as part of this project? Yes No

Have you indicated the measures that will be used to protect these features in the storm water management plan? Yes No

Please indicate which plan pages include this information. _____

Prior to any work beginning, the owner listed below agrees to the following (Please initial next to each statement):

_____ Hold the City of Birmingham, its officers, agents and employees, harmless from any and all claims made against the City of Birmingham, which arise out of any action or omission of the owner, contractor or subcontractor, or any of their officers, employees or agents, and any and all claims which result from any condition arising out of, created or maintained by the owner, contractor or subcontractor or any of their officers, employees or agents.

_____ In signing this application, the applicant agrees that the city engineer may enter upon the private property identified in this application upon reasonable notice to the owner and the person in possession thereof and during normal business hours and upon the presentation of appropriate credentials for the purpose of performing investigations to: verify owner compliance with the City of Birmingham Post Construction Storm Water Ordinance; determine whether corrective actions are needed; verify satisfactory compliance with any requested corrective actions; and, investigate any suspected violation(s) of said ordinance. Proof of a violation of said ordinance is not required for entry onto a premises. Any officer, employee, or other authorized agent who performs the duties of the city engineer authorized by said ordinance in accordance its provisions shall be immune from arrest and prosecution for trespass while performing any legal duty pursuant to this ordinance by presenting identification issued by the City of Birmingham. Identification issued by the city shall be presented by the city official at the time of entry.

_____ That I have read this application and that all information contained herein is true and correct. That I agree to comply with all city ordinances and State laws regulating this construction.

_____ I hereby certify that I have read this application and that all information contained herein is true. If any portion of this information, either intentionally or unintentionally, is false or is a misrepresentation of the material facts, the permit or process granted will be void. I further certify that if I am not the owner, I have proper authorization from the owner to act as representative on his/her behalf and that I may be required to provide written documentation of such authorization to the City of Birmingham.
